### **HAVE YOU HEARD?? ULTRASOUND!!!**

Animal Medical Center of the Antelope Valley (AMC) has partnered up with a Cardiologist, Radiologist, and Internal Medicine Specialist to provide Specialist ultrasound scans Monday- Friday. We are happy to be here as a referral service to other hospitals and clinics to assist the pets in our community. We have gone through this partnership to make it easier and more accessible for those pets in need. Patients will no longer be required to travel and wait for a specialist for up to a month to have a scan done. Our ultrasound scans will most importantly be affordable and available for emergency use with same day appointments and same day results.

We offer full echocardiograms with our cardiologists to further diagnose and properly treat common heart conditions. Our abdominal scans in partnership with internal medicine specialists will help diagnose abdominal abnormalities, and lastly we offer CT Scans to further assist with more advanced imaging needs.
